To: Whom it may concern,

I worked with Paycore Enterprises Ltd. on a project in the Caribou. They provided a very good quality, efficient and reliable drilling services. The drilling was completed ahead of schedule with no break-downs.

Paycore management supplied an on-site foreman which aided in a smooth running of the drilling program and technical problems to a minimum. The drillers were experienced and did a good job with consistent core recoveries. The entire staff of the company was courteous, accessible and easy to communicate with and readily adaptable to changing project requirements.

The drill-rig moves and set-ups were done quickly and efficiently. The company completed the project in a timely manner and all the workplaces, including drill-sites, were properly cleaned-up. The equipment was well maintained and that resulted in the absence of technical problems and break-downs.

I would work with Paycore Enterprises Ltd., again, given the opportunity.
