November 6, 2009

To Whom It May Concern:

Paycore Enterprises Ltd. drilled the 2009 summer season for our company. They completed 4084.5 meters of NQ II drilling. The deepest hole that we required them to complete was 624 meters. The drilling conditions on our property are challenging, including blocking ground and deep clay seams.

They have proven to be a reliable and productive drill company who produces excellent recovery. Their onsite management proved to be beneficial and minimized downtime. Their employees are professional and productive. They have well maintained equipment with a good inventory of spare parts and supplies.

Given the opportunity, we would hire them back for future drill projects.

Yours truly,

Irvin Eisler
President
